Aplikacijos Liejami dangai

Aplikacijos yra puikus būdas kardinaliai pakeisti EPDM žaidimų aikštelių išvaizdą. Aplikacijos kaip ir liejama danga yra gaminamos iš SBR ir EPDM gumos granulių. Kai kurios 3D aplikacijos yra įliejamos su danga kartu, kitos yra dedamos ant išlietos dangos, todėl jų vietą galima laisvai keisti. 2D aplikacijos yra įliejamos kartu su danga. Aplikacijos gaminamos iš perdirbtų medžiagų, todėl yra draugiškos gamtai, aplikacijos yra atsparios aplinkos, UV spindulių poveikiui.
